RECOMMENDATION FOR FIBRE BASED INTEGRATIONS CC

This serves to provide a referral for Fibre Based Integrations. We have been working with Fibre Based Integrations and Andre Potgieter on the roll-out of the Gautrain rapid rail link project.

Phase 1 of the project was to link OR Tambo International Airport with Marlboro station and Sandton station in time for World Cup 2010. Phase 2 of the project was to link Sandton Station with Park Station and Marlboro station with Midrand, Centurion, Pretoria and Hatfield station.

The fibre optic backbone, totaling in excess of 190km was installed and spliced by Fibre Based Integrations. Part of their scope of work was to supply, install and commission the Teleste single mode fibre optic transmission equipment which has now become our standard. A total number of 162 way side cameras was installed and commissioned by Fibre Based Integrations technicians.

Fibre Based Integrations has always conducted themselves in a professional manner and the after sales service that we receive from them is from the highest standard.

I continue to enjoy working with Fibre Based Integrations, and would highly recommend them on any similar project.

Should you have any questions, please feel free to contact Mr. Carl Weber on 083 634 1341 or 011-589-4401.

Yours faithfully

For and on behalf of Bombardier Transportation UK Limited (SA branch)

Dave Barry
Vice President
