TO WHOM IT MAY CONCERN

**RE: PROFESSIONAL RECOMMENDATION FOR
FIBRE BASED INTEGRATIONS CC**

This letter is written to provide a recommendation for Fibre Based Integrations CC. I had the pleasure of working with Fibre Based Integrations on various projects over the past 11 years. While assigned to these projects, I worked closely with Mr Andre Potgieter.

These projects included Cape Town City Centre Surveillance monitoring, Johannesburg City Centre Surveillance monitoring, Tshwane City Centre Surveillance monitoring, Gabon Franceville, Gabon Port Gentile, Gabon Franceville and Roslyn/Nissan Surveillance monitoring.

Fibre Based Integrations' scope of work consisted of the design of the communication backbone, supply and installation, testing and splicing of the fibre optic cable and supply, install and test of the fibre optic transmission equipment. This equipment used is from Teleste and manufactured in Finland. We have standardized on Teleste as our transmission medium in City Centre Surveillance as a result of the exceptional quality of signal obtained and the minimum failure rate received.

Fibre Based Integrations is our preferred communication backbone and system designer as a result of their years of experience in the transmission field and the professional manner in which they approach the project.

I would look forward to working with Fibre Based Integrations and would highly recommend them on any surveillance project which they may tender on.

Should you have any questions, please feel free to call me.

Yours sincerely

Mr. Thys Le Grange
