

19 July 2011

To whom it may concern

**REFERENCE FOR FIBRE BASED INTEGRATIONS (FBI)**

We confirm that FBI is currently involved with Sasol's SNI Project where a fibre optic cable is being installed with a 10" steel welded pipe line.

August Paul and his team has been on the project since October 2010 working with the Cathodic Protection Contractor (ACE Contracting) who prepares splicing locations (excavations) where the fibre optic cable has been installed by WBHO (the main contractor).

FBI has been pro-active, co-operative, and professional in work carried out to date.

Kind Regards

---
